SANSA Postgraduate Bursaries 2020:

South Africa needs an increase in science and engineering graduates if we are to effectively resource the country with necessary and scarce skills to achieve goals of the National Development Plan and ensure a successful and sustainable future for our citizens. SANSA provides post graduate degree bursaries to contribute to the national target for qualified post graduates in science and engineering.

The main criteria used in the selection of successful applicants are financial need, academic potential and career-oriented study programmes.

Please note the following:

- An application will only be considered if it has been completed properly and in full.
- Documents that accompany the application form must be **uploaded** and **certified**.
- Testimonial form must be completed by the supervisor and uploaded to the application form.

For the **2020** academic year successful applicants will receive bursaries with values as stated below:

- Hons – R75 000 (one year).
- Masters – R100 000 per year for two years.
- PhD – R130 000 per year for three years.

Applicants may not hold a combination of bursaries that exceed these amounts. Should an applicant have another bursary of lesser amount, SANSA will consider providing a top-up amount to the student provided the student meets the criteria mentioned above.

Support for continuing years is not guaranteed and will depend on satisfactory progress during the previous year.

The completed application must be submitted no later than **15 September 2019** if you want to be considered for a bursary for **2020**.

APPLY NOW!

This is Space Calling!

Join the South African Space Agency ...

Are you interested in working within the space sector to bring real benefits to society?
Are you ready to take on exciting space challenges?
SANSA is looking for individuals who are driven and forward thinkers!

Apply now for a SANSA postgraduate bursary for the 2020 academic year in the below fields

Earth Observation (Hons, MSc, PhD)

- Remote sensing
- Geospatial programming
- Earth system science with remote sensing
- Earth observations in ecosystems accounting
- Applications of remote sensing in environmental management including oceans and marine, agriculture and rangelands, water resource management, mineral resources and spatial planning

Engineering (MEng, MTech, MSc, PhD, DTech)

- Software and software systems engineering
- Aeronautical, aerospace, mechanical, electrical, Electronic, mechatronic and computer engineering
- Space, systems, antenna and RF engineering

Space Science (Hons, MSc, MPhil, PhD)

- Antarctic radar studies of climate change
- Multi-instrument studies of space weather
- Modelling geomagnetically induced currents in power systems
- Multi-scale ionospheric physics, structure and dynamics
- Ionospheric and radio propagation modelling
- Theory of waves and solitons in plasmas

All SANSA divisions (Hons, MSc, PhD)

- Computer science
- Information systems
- Software and systems engineering
- Data science
- Field of your choice related to key SANSA objectives

Closing Date for Applications: 15 September 2019
 Requirements and application forms can be found on the SANSA website:
<http://www.sansa.org.za/bursaries>
 Send enquiries to grants@sansa.org.za
 Only complete forms will be considered for selection.
